FOR THE STORAGE OF FERTILIZERS

PORTABLE FERTILIZER TANK  
KINGSPAN TITAN

# AgriMaster®

PERFECT SOLUTION FOR FARMERS  
EASY AND SAFE STORAGE AND DISTRIBUTION  
OF FERTILIZERS

## POSSIBLE APPLICATIONS

- AgriMaster® is a device intended for storing and distributing urea-based liquid fertilisers (e.g. saltpetre-urea solutions), which, due to their properties, cannot be stored in corrosion-prone tanks.
- Owing to the broad range of possibilities of using urea-based fertilisers (and, in particular, the saltpetre-urea solutions), the AgriMaster® tank is used on nearly all farms dealing with wheat, rapeseed, maize, beet, potato cultivation as well as with other vegetable and orchard crops.
- AgriMaster® is available in the capacity of 9000 and 15000 liters. The tanks can be easily combined in batteries, thus increasing the usable capacity of the devices.

## ADVANTAGES

- › Kingspan Environmental products are made of medium-density polyethylene. The material used is corrosion-resistant, thus ensuring long-term service life of the product. The technology of rotational moulding (one cast), which is used for the production of AgriMaster®, guarantees safety of fertiliser storage.
- › The tank was designed in a way, ensuring easy operation and maintenance. Its standard and optional equipment guarantees problem-free use.
- › No advanced construction works are required to set the tank.
- › The single-skin version is semi-transparent, so it is easy to see the liquid level in the tank.

- › The product has been manufactured in accordance with quality requirements of BS EN ISO 9001 : 2008.
- › The low weight and unique structure guarantee safe and easy transport of an empty tank, which is an additional advantage of the product, considering the seasonal use of fertilisers. An empty tank can be moved without using heavy equipment. Tanks can be combined in batteries, thus obtaining any usable capacity.
- › The possibility of wholesale purchases of liquid fertilisers at lower prices.
- › 10-year warranty on bunded tanks, 5-year guarantee on single skin tanks.
- › We ensure warranty and post-warranty services and full availability of spare parts and accessories.

## AVAILABLE CAPACITIES AND DIMENSIONS

### SINGLE SKIN TANKS

**PRODUCT CODE**  
OAM09000TG\_BO\_2  
OAM09000TG\_BO\_3

**Capacity** 9000 l  
**Diameter** 2.30 m  
**Height** 2.90 m

**PRODUCT CODE**  
OAM15000TG\_BO

**Capacity** 15000 l  
**Diameter** 2.45 m  
**Height** 3.50 m

### BUNDED TANKS

**PRODUCT CODE**  
BAM09000GN  
BAM09000GN\_PRE

**Capacity** 9000 l  
**Diameter** 2.45 m  
**Height** 2.95 m

Product dimensions may vary within +/- 1%.

\* Code ending depends on product equipment.

## STANDARD EQUIPMENT

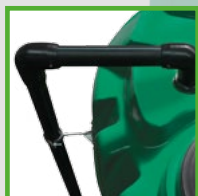

Tanks	Single skin	Bunded
Inspection lid, 16" (for 15,000-litre tank, 18.5").	●	●
Inspection lid, 8".	●	●
Bottom outlet (2" or 3") made of stainless steel with a ball valve (2" or 3").	●	
3" upper spout, threaded (available for the OAM09000TG_BO_3 version).	●	
2" filling and suction line made of stainless steel with a connection at the working level with a 2" ball valve ends with an aluminium connection of the STORZ type (2", 66 mm).*BAM09000GN-PRE.		●
2" filling and suction line made of polyethylene with a connection at the working level with a 2" ball valve ends with an aluminium connection of the STORZ type (2", 66 mm).*BAM09000GN.		●

## OPTIONAL EQUIPMENT

Tanks	Single skin	Bunded
Access platform.	●	●
Stainless steel connection of the STORZ 2" type.	●	●
Watchman Sonic Plus - liquid level indicator and leak sensor.		●
Thermal insulation of the inner tank.		●

› Filling and suction line made of stainless (BAM09000GN\_PRE)

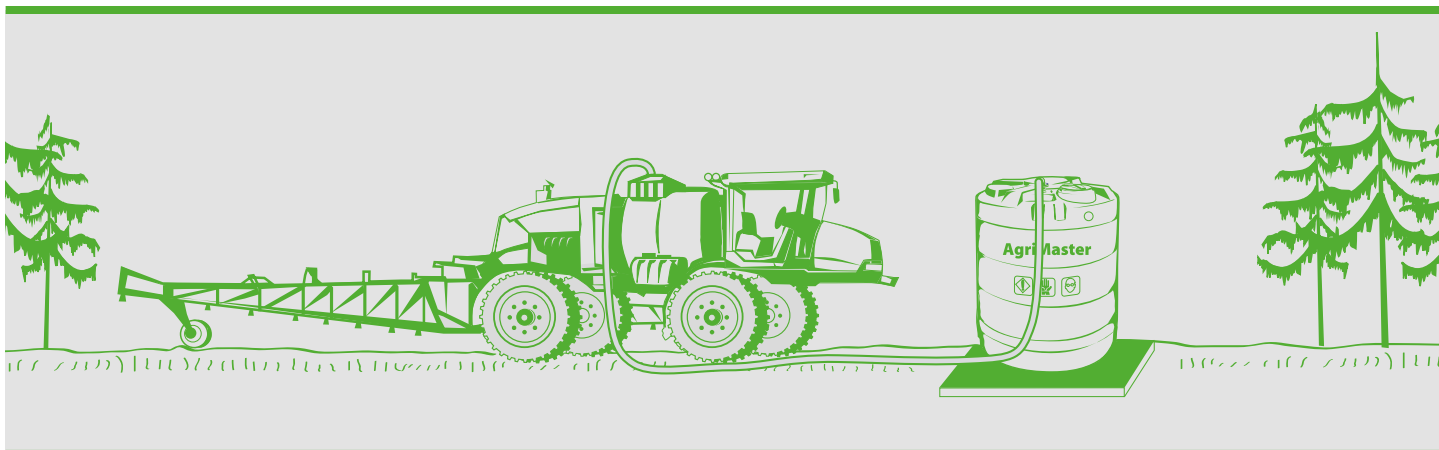

› Filling and suction line made of polyethylene (BAM09000GN)

› Bottom outlet (single skin tanks only)

## THE PLACE OF SETTING THE AgriMaster® DEVICE

Tanks can be set in an open space without any particular restrictions. The device should be placed on an even and stable surface. The tank does require any foundations, stands or another form of fixing to the surface\*.

\*Detailed information on the tank foundation can be found in the product manual.

## WHAT IS A SALTPETRE-UREA SOLUTION?

› The saltpetre-urea solution is one of the cheapest and most efficient nitrogen fertilisers. Owing to its liquid form, it is easily absorbed in the area of the plant root system, which means it has a considerable advantage over granulated fertilisers.

› This fertiliser can be used on all kinds of soil.  
 › The saltpetre-urea solution is an irritant substance, which can cause corrosion; therefore, tanks made of corrosion-resistant materials (e.g. plastic) are required for its storage.

The exact hues of the colours presented in the flyers may differ, depending on the quality of print.  
 Product specifications may be slightly modified; to obtain an up-to-date equipment specification contact the Kingspan Environmental office or the nearest distributor.
